

Better Care Fund – Integration Executive Integration Resources - August 2019

A. Exploring the new world; Practical insights for Funding, Commissioning and Managing In Complexity.

This paper builds on our previous work which outlined an emerging complexity–informed ‘paradigm’ for funding and commissioning of social interventions and explores what a complexity–informed approach looks like in practice, from the perspective of funders, public sector commissioners and those who work on ground

B. Social Care Institute for Excellence Bulletin -

The latest bulletin can be found using the link below. It includes articles on Supporting people with learning difficulties to live longer, advance care planning and Integrated Care and Research Practice;

<https://scie-mailing.org.uk/4O5-6B9TS-D3R4OATY6F/cr.aspx?v=0>

C. Care Homes and Equipment; Guiding principles for assessment and provision

This guide sets out overarching principles for the assessment, provision and maintenance of equipment for people living in care homes. Current legislation lacks clarity in regards to responsibility for the provision of specialist or ‘out of the ordinary’ equipment in care homes.

F. Health in all Local Industrial Strategies?

This briefing reflects on the emerging importance of health to many of the early draft local industrial strategies, explores the opportunities for the NHS that exist at both system and organisational level and outlines how to engage with and influence the development of these strategies in the coming year.

<https://www.nhsconfed.org/resources/2019/06/health-in-all-local-industrial-strategies>

G. Older people living alone are 50% more likely to visit A&E than those who live with others

Research published by the Health Foundation to look at the health care needs of older adults finds that people aged 65 and older who live alone are 50% more likely to go to A&E than those who live with someone else. They are also at increased risk of being admitted to hospital as an inpatient.
